Create Reservation (UC-R1)

Client-side validation + REST POST [/api/reservations](#) (simulated).

Digits-only ID • Date logic

Employee ID	Employee Name	Item
e.g. 120034	e.g. Jan Novak	Safety Boots Pro (Boots)

Employee ID: Digits only.

Employee Name: e.g. Jan Novak

Item: Safety Boots Pro (Boots)

Desired Term (date picker): 06.01.2026

Unavailable: weekends and past dates (same logic as calendar UC-R12).

Create reservation **Open calendar** **Go to history**

UX states

- Live validation (digits-only ID, date availability).
- Submit shows loading state.
- Success redirects to History (UC-R5) for demo.
- Email notify (UC-R13) is triggered from History row details.

UC-R13 (email notification) is handled in **History** by selecting a row and sending notify from there.
