✔ **SWES UI**   Overview

Overview   Create   History   Calendar

SWES Reservation Module

Next.js + TypeScript + Bootstrap. Focus on UI logic, UX states, and REST handling (simulated).

Responsive   Shareable URL state   Loading / Empty / Error

+ UC-R1 — Create Reservation   Form

Employee ID (digits-only) + Item dropdown + Date picker + validation + submit.

☰ UC-R5 — Equipment History   Filters

Table + sticky header, sorting, pagination, and mobile cards.

▦ UC-R12/13 — Calendar + Notify   API

Monthly calendar (available/unavailable). Notify simulation via /api/notify.
